Application fee waived!

Improve your English language skills while studying your academic subjects!

'If your first language is not English, then I highly recommend Foundation Studies. Not only does Foundation Studies assist with improving your English language skills, but it also helps you prepare for university.

'Starting Foundation Studies is a big step for many students, including me. Being new and far away from home is not easy. However, the teachers and other students at RMIT College really helped me adjust to the new environment. I did so well, I won an RMIT Foundation Studies Scholarship for Academic Excellence!'
