### Course Description

This course is designed to introduce you to 2D and 3D communication processes. Basic drawing principals, skills, techniques and a wide range of mediums and methods will be used to develop and present concepts which are applied across projects in all design courses.

### Objectives/Learning Outcomes/Capability Development

**Learning outcomes**

At successful completion of this course you should be able to:

1. Explore a range of drawing techniques.
2. Demonstrate skills in rendering and technical drawing.
3. Use a wide range of materials used in 2D and 3D design areas.
4. Undertake media experimentation using different skills and techniques to complete a series of projects.
5. Develop a basic understanding of colour theory, principles and application.
6. Discuss your work in a historical and cultural context.

### Overview of Learning Activities

Your knowledge and skills will be developed incrementally in the project activities increasing in complexity and reinforce information given in earlier projects.

Practical demonstrations and understanding of learning outcomes will be developed through exercises and projects. Your visual diary and project development will be supervised and assessed progressively in a studio environment.

### Overview of Learning Resources

You will be supported in your studies with online resources via myRMIT. This portal gives you access to important announcements, staff contact details, the teaching schedule, assessment timelines and a variety of important teaching and learning materials. You can access online learning tools and content for your program and...
