STATEMENT OF AUTHORSHIP:

I certify that I am the author/one of the authors (circle appropriate one) of the research listed on this form and that this authorship meets the following definition of authorship.

Authorship is substantial participation, where all the following conditions are met:
1. Conception and design, or analysis and interpretation of data; and
2. Drafting the article or revising it critically for important intellectual content; and
3. Final approval of the version to be published.

Participation solely in the acquisition of funding or the collection of data does not justify authorship. General supervision of the research group is not sufficient for authorship. Any part of an article critical to its main conclusion must be the responsibility of at least one author. An author’s role in a research output must be sufficient for that person to take public responsibility for at least that part of the output in that person’s area of expertise. No person who is an author, consistent with this definition must be excluded as an author without their permission in writing.

The nominated executive author for the whole research output and who has agreed to take responsibility for record-keeping regarding the research output is:
