

Maths for Engineering, Geospatial and Applied Science

Prepare for your course with this free, self-paced workshop. It covers all the topics you need to know, including calculus, trigonometry, functions and graphs, and equation solving.

You should attend if you:

- are returning to study and want to improve your maths skills
- finished secondary school maths too early for present needs
- want to improve your current skill level in maths
- are moving from Vocational Education into Higher Education.

When

Please choose one of the following week-long sessions:

| DAY | DATE | TIME |
|---------------|----------------|----------|
| Monday–Friday | 11–15 January | 10am–3pm |
| | 1–5 February | |
| | 15–19 February | |
