

“

When I was in Year 10, I had a friend in Year 12 who was doing higher ed studies at RMIT. I thought that's pretty cool—being in school and studying a university course. I want to do that.

I've learned about Java and web programming. We learned the really technical stuff and theory but put it into practice developing a website, front and back end. I'm much stronger in my programming now. I'm developing my own website to strengthen everything I've learned.

Most of our assignments were group work and I met loads of other RMIT students. It was good to speak to them about what they liked, their other subjects and to learn from them.

My tutors were great too—always willing to help out and go above and beyond for us. And they were always throwing new and different content at us. They're so enthusiastic about their subjects.

RMIT is really strong in its technology foundations. Other universities don't specialise as much. That's one of the reasons I want to come here and do my computer science degree. Also, being placed with all the current degree students means I know what I'm getting myself into!

”

# VCE Extend at RMIT

Callan Delbridge  
VCE Extend Computer Science

# You know what you want and what you're capable of so why wait?

## Get a head start at university and boost your ATAR with VCE Extend!

VCE Extend at RMIT gives high achieving Year 12 students a head start at university by offering fully accredited VCE extension studies in an exciting range of areas.

### BOOST YOUR ATAR

VCE Extend counts towards your ATAR with up to a five-point boost and as a fifth or sixth subject towards the completion of your VCE.

### EARLY OFFER

Our VCE Extend students do so well at university that you could receive an early offer to RMIT for your degree based on your VCE Extend results!\*

\*Students need to meet prerequisites and list RMIT programs in their VTAC application to receive their final offer.

### GET CAREER READY

RMIT programs are designed in consultation with industry leaders and taught by practising professionals. You'll gain skills that will make you highly employable and will help you stand out from the crowd.

### NO FEES

There are no application or student fees for any of our VCE Extend courses.

### WORLD CLASS TEACHING AND FACILITIES

At RMIT you'll learn from expert academics working at the forefront of their professions and have access to the outstanding support services RMIT offers.

### CREDIT FOR YOUR STUDIES

All VCE Extend subjects will be credited towards your future studies. This means you can finish your undergraduate degree faster or take advantage of opportunities for internships or exchange programs.

Prepare yourself for university success and get equipped with the skills and knowledge to transform your future with VCE Extend.

Visit [www.rmit.edu.au](http://www.rmit.edu.au) and search VCE Extend to learn more and register your interest.
