General description
The enterprise and entrepreneurship room will provide basic AV facilities for student and facilitator presentations. It will allow a number of connection points for permanently mounted computers around the periphery of the room.

Supported learning modes
Didactic / lecture presentation
In didactic mode, students and facilitators will use basic AV presentation systems to deliver simple presentations.

Collaborative / group work
In collaborative mode, group work will be supported by shared audio visual signals.

Layout
AV presentation facilities will support classroom style delivery. A small cupboard will house dedicated PC and AV equipment.
Users will load DVDs, USB devices and other media directly to the cupboard-mounted PC.

Video display
The AV presentation system will consist of single projection onto a nominated wall. Video will be provided in a wide aspect ratio, sized and specified primarily for the presentation of data.
Users will be able to connect a laptop to the presentation display or to use a dedicated PC.

Control
Control of the presentation system will be via a wall mounted keypad controller at a location adjacent to the display.
The presentation system will be controlled by the provided keyboard and mouse.

Interactivity and collaboration
The connection of local PCs to the main display encourages students to share their work and make informal presentations.
