**Notes**

The scale % AGREE is calculated by adding up all the items scored Agree/Strongly Agree across all respondents. This is divided by the total number of items answered across all respondents. Blanks, doubles or N/A’s are excluded. Percentages represent the %age of the total valid responses per question, with the exception of the demographics section which represent the %age of total responses. Charts are rescaled on valid responses to total 100%. An asterisk (*) indicates a negatively worded question recoded to calculate % AGREE. Values may rounded to 101 %.
