10 reasons to study at RMIT University

Pharmacy

1. A rapidly aging population in Australia places more emphasis on the role of health professionals, including pharmacists, in enhancing the health status of the community.

2. RMIT’s Bachelor of Pharmacy is Victoria’s newest pharmacy degree and serves Melbourne’s expanding population.

3. Experience the latest state-of-the-art purpose-built facility for the training of pharmacists at RMIT’s Bundoora campus.

4. Graduates will have the requisite knowledge, skills and attributes to enter into an approved intern year of preregistration training and supervised practice.

5. Pathways into pharmacy are available if you have successfully completed the first year of RMIT’s Bachelor of Biomedical Science, Bachelor of Biomedical Science (Pharmaceutical Sciences) or Bachelor of Biomedical Science (Laboratory Medicine). Eligible students may apply for entry into second year of the Bachelor of Pharmacy. Places are limited and will be offered on a competitive basis for students who achieve a high GPA.

6. Graduates will also have access to research opportunities through RMIT’s Health Innovations Research Institute, including honours, master and PhD research programs.

7. Be taught by experienced and passionate academic staff, including registered pharmacists with industrial, hospital, community, research and academic experience.

8. Students will develop the skills of a pharmacy practitioner in the simulated environment of a model pharmacy, and practical work experience in hospital, community and specialist work integrated learning environments.

9. As well as providing the traditional pathway to become a hospital or community pharmacist, students also receive training in high-demand areas such as pharmacovigilance and clinical trials, offering graduates a wider range of pharmacy-related skills and career options.

10. Be part of a small and highly motivated group of students in a vibrant yet tranquil setting, offering a satisfying and rewarding university experience.
