10 reasons to study at RMIT University

Biomedical Science

1. Obtain a broad understanding of human anatomy, physiology and pathology from cellular to systems level.

2. Learn in small classes with excellent staff-student ratios in an intimate campus setting.

3. Obtain hands-on experience in practical classes focused on developing work-relevant skills.

4. Study in up-to-date learning and teaching facilities with modern equipment, as well as human anatomy laboratories where you will learn using real human specimens.

5. Gain a broad knowledge base in the biomedical sciences, with opportunities to specialise as you progress through the program.

6. An ideal preparation for graduate entry programs in the health sciences such as medicine, physiotherapy and dentistry, allowing you to meet all necessary prerequisites.

7. Excellent preparation for employment in research laboratories.

8. Opportunities within the program for study abroad or to obtain international experience.

9. A common first year curriculum enables flexibility for student transfers between other biomedical programs at RMIT and the Bachelor of Biomedical Science.

10. Opportunity to progress to a research-based honours year, then subsequent master or PhD by research programs.
