<tr>
<td>Course Description</td>
<td>The aim of this course is to provide an introduction to design language and theory and approaches to problem solving necessary for interpreting and undertaking a range of design projects. This includes the development of a range of tools for analysing and documenting research, communicating design concepts and engaging effectively within the class group and project teams.</td>

### Objectives/Learning Outcomes/ Capability Development

**Learning outcomes**

At successful completion of this course you should be able to:

1. Interpret a design brief.
2. Research, analyse and review reference material.
3. Explore and apply methods for concept development.
4. Demonstrate knowledge of design theory and concepts.
5. Effectively communicate concepts in class discussion and in presentations using appropriate design terminology.
6. Discuss your work in a historical and cultural context.

### Overview of Learning Resources

You will be supported in your studies with online resources via myRMIT. This portal gives you access to important announcements, staff contact details, the teaching schedule, assessment timelines and a variety of important teaching and learning materials. You can access online learning tools and content for your program and
Overview of Assessment

Assessment tasks are directly linked to the learning outcomes and may include, a series of projects, in-class exercises, written reports, research analysis and oral presentations.
