GREEN INFRASTRUCTURE AND THE CITY
SUSTAINABILITY AND THE CITY

WITH DEBORAH KUH ON TUESDAYS 1.30 TO 4.30 AND FRIDAYS 9.30 TO 12.30

This studio will explore how green infrastructure could be interwoven into the fabric of a city to create a more sustainable urban paradigm. Specifically, within the context of urban design, we will view sustainability as an all encompassing concept - not as a ‘product’ or segregated discipline but as a holistic approach to thinking and design. Further, we will view green infrastructure as an integrated open space strategy involving public and private open spaces, soft and hard landscaping, urban furniture, movement infrastructure, networks, water, energy, waste, and more.
