Program Plan:

Resources Needed:
- Kit of Materials

Rational:
This project is important to do as it empowers young people to make informed decisions on how to enrol, why it is vital they enrol and ultimately vote in local, state and national elections. There is evidence to support the notion that a percentage of young people either do not enrol or not do make informed decisions about who they will vote for. The purpose of this kit of materials is to help empower young people to feel confident and comfortable when enrolling to vote and make informed decisions when voting in elections.

Goals and Objectives:
To engaged young people to enrol to vote in Local and State Elections.

To simplify voting procedures to make the enrolling process accessible to young people.

To provide useful information in the form of a kit, which will include literature about all parties one can vote for, to allow young people to make informed choices.

To generate young people’s interest in politics and youth advocacy.

Brief Outline:
- Introduce myself, youth work student, why I am there, mention the kit of materials.
- discuss at the beginning of the session a disclaimer allowing any student who does not feel comfortable talking about politics for whatever reason the opportunity to leave or not participate in the discussion.
- explain my objectives
- ask the following questions:
  * has already enrolled to vote
  * did you vote in the federal election
  * who knows what age you can enrol and what age you can vote
- Hand out the kit of materials, allow the participants to look through it and ask if there are any questions
- Debrief, reinstating what I hope the participants will get out of this session, ask if there are any questions.
- Thank everybody for participating.

Evaluation Method:
My main evaluation method will be the feedback sheet at the completion of my facilitation. This includes feedback on what worked and did not work from the participants. Whether they feel my objectives were clear and achieved. (allow 5 mins)
