

Chemistry for Science and Engineering Students

Build your chemistry skills over two five-day workshops:

Workshop 1 covers the fundamentals, including problem-solving practice, atoms, electronic structure, the periodic table, elements, compounds, equations and balancing.

Workshop 2 extends chemistry principles and involves further problem-solving.

You should attend if you:

- are a science and engineering student
- are returning to study and want to build your chemistry knowledge
- want to improve your current skill level in chemistry
- are moving from Vocational Education into Higher Education.

When

DAY	DATE	TIME
Workshop 1: Monday–Friday	8–12 February	10am–3pm
Workshop 2: Monday–Friday	15–19 February	

Where

City campus (check website for details)
