Program Information

VCE Extension Studies: Extend your VCE studies at RMIT

RMIT VCE Extend allows high achieving students to get a head start at university by offering fully accredited VCE extension studies.

In 2016 students can choose from the following subjects:

- Calculus
- Computer Science
- Engineering
- Environmental Science
- Geospatial Science and Surveying
- Project Management
- Science

VCE Extend subjects are taught at the City campus and are counted towards students VCE and provide a boost to their ATAR.

There are no fees or HECS for our VCE extension studies.

For students who live regionally our Science, Computer Science and Environmental Science offerings are also available online - making extension studies accessible to all.

Applications will be accepted from Monday 10 August until Monday 7 December.

To register your interest before applications open please visit the RMIT Extension Studies page.

New Program - Bachelor of Engineering (Automotive Engineering)(Honours)/Bachelor of Industrial Design (Honours)

The Bachelor of Engineering (Automotive Engineering)(Honours) and Bachelor Industrial Design (Honours) is a specialised program that addresses the ongoing demand for automotive engineers with an industrial design background.

RMIT is offering this new double degree in response to the changing landscape of automotive manufacturing.

New Program - Bachelor of Analytics

The Bachelor of Analytics (Honours) provides students with complementary skills in analytics, tapping into studies in statistics, operations research, computer science, information technologies, business, economics, finance and marketing.

With exponential growth in available data, the analytics discipline has emerged as a key field requiring skilled analysts.

Not offered in 2016 - Electronic Product Design Engineering program update

The Bachelor of Engineering (Electronic Product Design) (Honours) will not be offered in 2016. Students interested in this area are encouraged to consider the Bachelor of Engineering (Electronic and Communication Engineering) (Honours) which covers the same study areas.

Program Information

Fashion Industry School Based Apprenticeships

RMIT Fashion and Textiles have entry programs that can also be undertaken as School Based Apprenticeships.

In the Certificate III in Dry Cleaning Operations students learn, the art of fabric care – including stain removal, pressing, shop assisting, customer service, money handling, technology, machine operation – programming and maintenance.

The Certificate III in Clothing Production enables students to produce garments, make patterns, perform grading and cutting, sewing and finishing. This program offers pathways into fashion, textile design and merchandising for a future career.

What’s Happening ‘On-Campus’

RMIT’s New Academic Street Project launches!

The New Academic Street project will transform the heart of RMIT’s City campus creating laneways, gardens, new student spaces and better library facilities.

Progressively over the next two-and-a-half years the project will upgrade the lower levels of buildings on Swanston Street. The enclosed interiors will be replaced by light filled learning and social spaces.

We aim to create a vibrant campus environment and NAS will help us on this journey by providing student benefits that really matter, such as:

- A new media precinct opening onto the corner of Franklin and Swanston Street including TV studios and the latest broadcast and real-time communication technologies
- The Swanston Library transformation, which doubles the library’s capacity and provides more than 2,000 study spaces
- Four levels of new study spaces spectacular rooftop views
- A new Student Hall that will co-locate key student services in one location providing better and more timely service to students
- Multiple casual collaboration spaces with 1,000 extra seats and new food options.

There will be laneways connecting Bowen and Swanston Streets, glass roofed arcades and rooftop green spaces. We will create more space in which students can relax and study while enjoying their campus life.

**Further Info:**  
What's Happening ‘Off-Campus’

Nuclear medicine workplace visits

Designed for students interested in finding out more about the role nuclear medicine technologists play in the investigation, diagnosis, treatment and monitoring of disease.

In this full day tour, students will visit nuclear medicine departments that support the Bachelor of Applied Science (Medical Radiations) program.

Tour details

St Vincents Hospital
Date: Thursday 24 and Friday 25 September 2015
Time: 10-12pm

Austin Hospital
Date: Thursday 24 and Friday 25 September 2015
Time: 2 - 4pm

RMIT Alumni Success

RMIT IT students create highly successful mobile app

A final-year project by two RMIT information technology students, Henry Bezuidenhout and Michael MacRae, has developed into a highly successful app with over half a million downloads.

The First Time Pregnancy App, was developed to help reassure expectant mothers about their baby’s development through the pre-natal period.

The app was made available to the public via the Google Playstore at the end of their final semester and its success has led to the start of a new business.
